

## Use Google Apps on an iPhone/iPad

### Sync an iPhone/iPad with Google Apps

Follow these instructions on your iPhone or iPad

1. Open the **Settings** application on the iPhone's home screen.
2. Open **Mail, Contacts, Calendars**.
3. Tap **Add Account...**
4. Select **Microsoft Exchange**.

5. In the **Email** field, enter your full nyac-umc.com address.
6. In the **Password** field, enter your password.
7. In the **Description** field, enter a name to identify this account, (e.g. NYAC mail)
8. On the next screen:
9. **Email:** your full address
10. **Server:** m.google.com
11. **Domain:** leave the field blank
12. **Username:** your full email address
13. **Password:** your password
14. Tap **Next** at the top of your screen. (Choose **Cancel** if the **Unable to Verify Certificate** dialog appears.)
15. Select the Google Apps services (Mail, Calendar, and Contacts) you want to sync.
16. Click **Save** at the top of your screen.
17. Unless you want to delete all the existing Contacts and Calendars on your phone, select the **Keep on my iPhone/iPad** option when prompted. This will also allow you to keep syncing with your computer via iTunes.

To sync only the **My Contacts** group, you must choose to **Delete Existing Contacts** during the Google Sync install when prompted. If you choose to keep existing contacts, it will sync the contents of the "All Contacts" group instead. If there are no contacts on your phone, the latter will happen -- the contents of your **All Contacts** group will be synced.

That's it! You can now access Google Apps from your iPhone/iPad. If you have Push enabled on the phone, synchronization starts automatically. You can also just open the Mail, Calendar or Contacts app and wait a few seconds to start a sync.
